Parental Controls Information
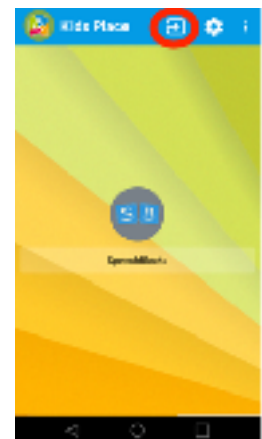

Your device is using a parental control app called "Kids Place." This means that your child can only access SpeechBlocks, and should not be able to access the internet, phone, SMS, or any other apps within this device.

However, in order to connect your phone to WIFI, you will need to exit out of Kids Place. To do this, you will need your phone's four-digit PIN number. *Please do not share this PIN with anyone, especially your child!*
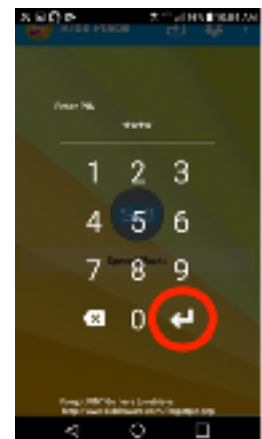

<div style="border:2px solid black; text-align:center;">
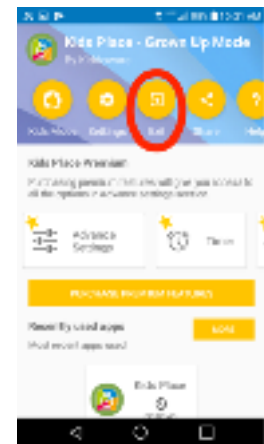

Your PIN is: 5736

</div>

WIFI Setup Instructions

Step 1: Exit the Kids Place app by clicking on the white "exit" button on the top right corner of the screen (circled in red below).

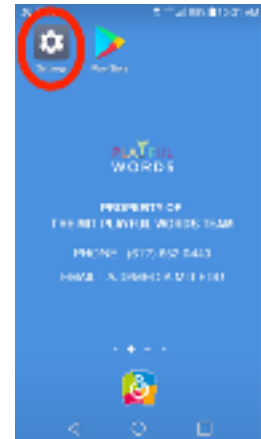

Step 2: Type in your four-digit PIN (located above) and then press "enter" (circled below).
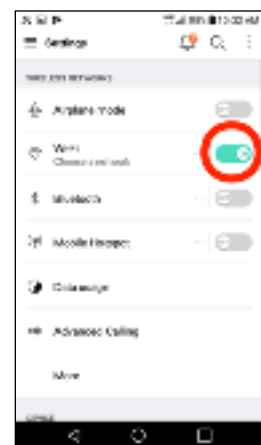

Step 3: Press the orange and white "Exit" button again (circled below).

Step 4: Once you have exited the Kids Place app, select the "Settings" icon (circled below).

Step 5: Switch the WIFI to "ON" (shown below). When you click on the WIFI tab (circled below), you will be able to view the different WIFI networks. Please select your home WIFI network and enter your WIFI password (if necessary).

Step 6: Once your WIFI has been set up, please return to the home screen and click the "Kids Place" app icon (circled below). Your phone should then enter back into the Kids Place parental control mode so that your children can safely play with SpeechBlocks!

If you have any questions, lose your PIN, or need any assistance, please contact us by email at aj@media.mit.edu or by phone at (617) 652-0440. Thanks!
